Following are some of the test scenarios that could be performed for this ToDo Application:

1. Verify that cursor is focused on "Username" text box on the page load.
2. Verify that tab functionality is working properly or not
3. Verify that User is not able to Login with inactive credentials
4. Verify that clicking on browser back button after successful login should not take User to log out mode
5. Verify that clicking on browser back button after successful logout should not take User to logged in mode
6. Verify that there is a limit on the total number of unsuccessful login attempts
7. Verify that the password is in encrypted form when entered
8. Verify that spaces should not be allowed before any password characters attempted.
9. Page is not redirect to sign in page after sign out.
10. User should not add 2 task and subtask with same name and same due date.
11. Web page must be Responsive
12. We can perform load testing
13. We can perform Compatibility testing on different browsers/versions.
14. All mandatory fields should be validated and indicated by an asterisk (*) symbol.
15. Field labels should be standard e.g. field accepting user's first name should be labeled properly as 'First Name'.
